For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2021-2022 job placement rate will be the number of students who completed the program in 2020-2021.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2020-2021, you do not need to report a job placement rate for 2021-2022. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 19.

Our institution has programs that meet these conditions.

20. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).

The University of Hawaiʻi Community College (UHCC) system revised the calculations for the institutional minimum or floor values and the aspirational goals for 13 - certificates, 14 - associate degrees and 17 - transfer to 4-year colleges/universities. Minimum or floor values are determined by the lowest value of the previous 3 years value. Aspirational goals are determined by an average of the previous 3 years plus 2%. In this report, you will find the new calculations applied to 2020-2021, 2021-2022 and 2022-2023 data.

By submitting this report on behalf of my institution, I confirm that the data and information contained herein is accurate and correct to the best of my knowledge.
