ETHNOMUSICOLOGY: A GLIMPSE INTO WORLD MUSIC
Come and try out various world musical instruments. Presented by Beryl Yang and students of MUS107. To study ethnomusicology is to explore the distinct theoretical and methodical approaches that emphasize cultural, social, material, cognitive, biological, and other dimensions or contexts of musical behavior, instead of only the music, or the isolated sound component. Ethnomusicology and the studies of musical expression, is closely related to Anthropology, and the studies of Folklore defined as “traditional customs, tales, sayings, dances, or art forms preserved among a people.”
