Kapiʻolani COMMUNITY COLLEGE

Comprehensive Program Review 2016-2019

Practical Nurse programs

As an open-door, community-based institution of higher education, Kapiʻolani Community College is dedicated to enabling its diverse students to attain their highest educational potential while providing them with a firm foundation for lifelong learning and contributing to their communities. The College is committed to providing a range of academic, career, and technical programs and support services designed to promote student engagement, student learning, and student achievement for success. From catalog

Mission Statement: Kapiʻolani Community College provides students from Hawaiʻi’s diverse communities open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals. The College, guided by shared vision and values, and commitment to engagement, learning, and achievement, offers high quality certificate, associate degree, and transfer programs that prepare students for productive futures.

Part I. Executive Summary of CPR and Response to Previous Program ARPD Recommendations

Kapiʻolani Community College and its satellite site at Leeward Community College have simulation (SIM) labs. All clinical courses for Practical Nurse use the SIM lab to assist students in bridging the gap between theory and nursing practice. Simulation offers an avenue to assess clinical judgment and critical thinking without jeopardizing patient safety. The SIM labs are up-to-date with the latest software with service warranties for 3 years.

The ATI-TEAS exam is used as a screening tool for the Practical Nurse admission to the program replacing the NLN entrance exam. Students can take the exam in the testing center in the campus library or other testing sites on Oʻahu. ATI is changing its scoring system for the entrance exam and the Practical Nurse program will require an accepting score at or above the proficiency level for all tested areas.

Part II. Program Description

The mission of the Nursing Department at Kapiʻolani Community College is to prepare entry-level nurses who are safe, caring, and competent providers of care across the health/illness continuum and responsive to the changing health care needs of our diverse community. The curriculum provides an innovative learning framework that fosters the development of critical thinking and problem solving skills that prepare our graduates to meet the rigorous employment standards in a variety of health care settings. Graduates will collaborate with other members of the health care team, to be effective communicators, to demonstrate leadership and to be committed to life-long learning.

1. History

The nursing department began with the Practical Nurse Program in 1947 when the college was known as Kapiʻolani Technical School. In response to community and industry needs, the department has developed various programs to meet workforce demands for different levels of nursing personnel. In 1972, the nurse aide program was established to provide nurse aides in acute care settings. In 1993 the program began
graduating long-term care nurse aides to meet community needs. The Associate in Science in Nursing (AS in Nursing) Program was transferred from University of Hawai‘i-Mānoa to Kapi‘olani Community College in 1988 when the University decided to offer
only the baccalaureate nursing program. In 1992, the Associate Degree in Science in Nursing program was accredited by National League for Nursing Associate Degree Council. The program continuously receives 8-year accreditations with its most recent accreditation awarded in 2014 by Accreditation Commission for Education in Nursing (ACEN).

The AS in Nursing program expanded in 2010 to include a satellite site at Leeward Community College. Courses are offered at the satellite site based upon available of faculty. The Practical Nursing program created a satellite site at Windward Community College in 2011 and this site was transferred to the Leeward Community College campus in 2015.

In fall 2012, the AS in Nursing program joined the Hawai‘i Statewide Nursing Consortium aligning the curriculum with University of Hawai‘i at Mānoa, Maui and Kauai nursing programs. The action enabled students to have a seamless transition into UH-Mānoa or the UH- Hilo Bachelor of Science in Nursing (BSN) degree programs.

2. Program Goals
   - To develop safe, caring, competent practitioners that will meet the rigorous employment and workforce demands for RNs and LPNs in the state of Hawai‘i.
   - To provide opportunities for our graduates to continue formal education by developing and maintaining partnerships with the UH-system and other baccalaureate programs.

3. Occupations for which this department prepares students
   - Registered Nurse
   - Licensed Practical Nurse
   - Certified Nurse Aide
   - Certified Surgical Technician
   - School Health Aide
   - Adult Residential Care Home Primary Caregiver

4. Program Student Learning Outcomes – Updated Curriculum 2017

   Practical Nursing
   1. Analyze professional responsibilities within the scope of practice.
   2. Demonstrate commitment to professional development.
   3. Collaborate with health care team to provide quality client care.
   4. Provide client-centered care.
   5. Provide effective communication to the client and team members.
   6. Incorporate clinical judgment when implementing the plan of care.

1. Credentials, Licensures Offered
   - Licensed Registered Nurse
   - Licensed Practical Nurse
   - Certified Nurse Aide
Certified Surgical Technician
Certified Adult Residential Care Home Primary Caregiver

2. Faculty and staff
There are 16 full-time and 9 part-time faculty assigned to the nursing department and two counselors. Faculty that teach 11 months in a year support ADN and PN courses that are offered during the summer session. There are three full-time staff members including one secretary, office assistant, and APT position for instructional support.

3. Resources
- KCC campus: 2 classrooms in Kopiko and 2 in Lē‘ahi, 1 SIM lab in Lē‘ahi, 3 labs in Kopiko and 1 in Lē‘ahi.
- LCC satellite campus: 2 classrooms that also serve as labs, 1 simulation lab
- SIM Lab: KCC - 1 SIM Man, 2 SIM Jr, 1 SIM Mom and baby, 2 Nurse Kelly
  LCC – 1 SIM Man, 1 Nurse Kelly
- Low fidelity mannequins: 25 at KCC and 10 at LCC.
- Equipment as appropriate to teach nursing skills
- 25 laptop computers for classroom testing; 15 at LCC.
- Each full time faculty member has their own office space with; share with another faculty member. Each office has a computer and printer.
- Lab resource manager
- Waiting to hire SIM lab manager, currently nursing faculty rotate this position
- Two counselors
- One instructional support (APT) employee
- One Medical Clearance half time employee

4. Articulation Agreements
- There are articulation agreements currently held with the University of Hawai‘i at Manoa and University of Hawai‘i at Hilo for BSN progression.

5. Community connections, advisory committees, DOE
- Annual advisory meetings are held by the nursing department and surgical technology program with leaders of the community from acute care, long-term care, and community-based settings to provide information and feedback about the graduates and community employment needs.
- The counselors regularly attend middle and high school career fairs to showcase nursing as a profession.
- Collaborated with Department of Education and Department of Health to establish the School Health Aide program.
- Department Chair attends Board of Nursing meetings.
- Attendance at bimonthly Centralized Clinical Placement System (CCPS) meetings to secure and maintain clinical sites for all programs.
- Faculty members are active members of professional nurses’ organizations.
- The nursing students participate in the annual Healthy Campus and community events providing health information.
- Students accompanied by clinical instructors obtain clinical experience at local acute care, rehab centers, long-term care facilities and ambulatory settings.
6. **Off campus Programs**  
The Practical Nursing program classes are offered at the Leeward Community College satellite site.

**Part III. Curriculum Revision and Review**

Part IV. Survey results: surveys changed during this time period

NURS141 – terminal course

1. How would you rate your overall learning experience in NURS 141?
   Summer 2016    89% outstanding or good
   Fall 2018       100% good

2. How satisfied were you with the program?
   Spring 2016    Satisfied or somewhat satisfied with the program  87% satisfied
   Summer 2018    Satisfied or somewhat satisfied with the program  76% satisfied

3. How would you rate the quality of the nursing program
   Spring 2016    Quality of nursing program 86% excellent or good
   Summer 2018    Quality of nursing program 100% excellent or good

Part V. Quantitative Indicators for Program Review

NURS: Practical Nursing: ARPD 2015 - 2018:

Perkins Indicators for the practical nursing program is healthy in Demand, and cautionary in Efficiency and Effectiveness.

Efficiency: The number of students captured in this report, has not taken into account that the starting date for the implementation of the new curriculum, which is being changed to start in the Fall and Spring semester. The last summer cohort started in Fall 2017 instead of the summer 2017. So one cohort of student data is missing from this report. The class data for the year had 16 graduates in Aug 2018 and 15 graduates in August 2017 for a total of 31 graduates. Average class size is defined as the number of students divided by the number of classes. The reported class size includes the CNA and ARCH classes which has the effect of lowering the number of students per class in the PN Program.

Effectiveness: The persistence from Fall 2017 to Fall 2018 for both cohorts is 86% and the amount of students that withdrew from the 2 cohorts (36) is 5 (12 listed). The number of Certificates of Achievement in Practical Nursing awarded is 31. The attainment of a Practical Nursing License was 97% from the cohorts that graduated in Fall 2017 and Fall 2018. The Persistence indicator does not represent the program because it lasts one continuous year, (no breaks with instruction – 3 semesters). Also as stated above the data is including courses not in the PN program (ARCH, CNA, SHW). Approximately 70% of PN students continue their education to obtain a ADN degree and RN licensure.

Seventy-five percent of the practical nursing graduates continue their education by enrolling in the AS in LPN to RN Transition nursing program instead of joining the workforce full-time. The majority of the graduates work part-time in long-term care facilities while continuing their education. (ARPD information about the PN program is mixed in with 4 other programs. The information is therefore incorrect on the ARPD).
### Demand Indicators

Part VI. Analysis of the Outcomes

Alignment with mission

The nursing department is in alignment with both the program and college’s mission.

*Kapiʻolani Community College provides open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals to diverse communities of Hawaiʻi. Committed to student success through engagement, learning, and achievement, we offer high quality certificates and associate degrees, and transfer pathways that prepare indigenous, local, national, and international students for their productive futures.*

The strategic plan 2015-2021

II. Hawaiʻi Innovation Initiative: Productive Futures of Students, Faculty, and Staff

Enhance workforce development efforts, linking to developing emerging sectors in Hawaiʻi’s economy while simultaneously providing a stable workforce for the traditional employment sectors.

(D) Develop local, national, and global community partnerships that advance the college’s strategic outcomes

75% of the PN graduates continued into the AS in Nursing program.

Nearly 50% of the nurse aide graduates continued into the PN or AS in Nursing program

IV. Modern Teaching and Learning Environments

Ensure that students and faculty have the learning and teaching environments appropriate for the third decade of the 21st century and the sustainability practices to maintain those environments.

(P) Demonstrate improvement to programs and services through continuous, robust outcomes assessment.

All PN courses are assessed each year.

Current Situation: Internal: Strengths and weaknesses

The PN program evaluation tool has been modified to ask students to rate their overall experience in the course. The majority of the PN graduates continue into the AS in Nursing program, the PN program is in the process of changing its curriculum to concept-base to be in alignment with the AS in Nursing program. The tables below denote the proposed changes in the program’s curriculum.

Part VII. Tactical Action Plan (projections for the next three years)

1. Outcome 1: Graduation.

**UHCC Performance Funding Measures**

(A) Increase annual CA completion by 5% from 2016-2021.

1a. Strategies.

- Continue to assess program student learning outcomes according to schedule.
- Use technology and other teaching strategies that promote student engagement and meet the diverse needs of the students to increase student retention and achievement.
- Assist students in understanding the value of certificates, associate and baccalaureate degrees.
• Continue to enforce the policy of referring students to counselor and resource lab when they score 72 or below on theory exam or do not meet performance criteria in clinical or lab experiences.
• Continue to use external sources such as Mountain Measurements and ATI Scores to identify and make changes in the curriculum as needed to improve student learning.
• Continue to use ATI testing to predict NCLEX pass rates.
• Complete curriculum revision and apply for accreditation.

1b. Position(s) responsible.

• Department chair, program directors, course coordinators, counselors, faculty, curriculum committee, support staff. All faculty are responsible for helping to gather data. The Department Chair and Program Directors will assist in analyzing the data.

1c. Synergies with other programs, units

• The Practical Nursing program invites experts from health science programs to deliver specific course content.

1d. Key community partners

• The department has Memorandums of Agreements with 22 facilities which include acute care, long term care, health care organizations and surgical centers.
• The department meets annually with the Community Advisory Committee.

2. Outcome 2: Innovation

Kapiʻolani Commitments

(A) Develop a tracking system to fully understand employer needs, clinical and graduate placements, graduate earnings and advancement, and needs for further education and training.

(B) Develop community partnerships locally and globally that advance the college’s indigenous serving goals.

(C) Increase private fund raising for needs based aid.

(D) Implement Open Educational Resources (OER) to replace textbooks to decrease cost to students.

2a. Strategies.

Graduate and employer surveys combined with annual advisory meetings assist in identifying industry needs for skills and employment. The bimonthly CCPS meetings also provide a forum for this feedback to occur.

2b. Position(s) responsible.

The department chair, program directors, support staff and assigned faculty.
2c. Synergies with other programs, units

Partner with other health science programs to identify community needs for continuing education and the Kūpuna Education Center. Continue to refer students to other health science programs as appropriate.

2d. Key community partners

The course program meetings serve as a basis for ongoing communication and feedback from industry. Continued representation is necessary in order for the programs to remain useful and current.

_Kapi'olani Commitments_

(A) Invest in outreach to high schools, GED programs, Native Hawaiian and Pacific Islander community partnerships.

(C) Integrate recruitment of working age adults into overall workforce development system.

(B) Focus on campus-based re-enrollment strategies.

3a. Strategies.

Persistence: Mandatory referrals to the lab resource instructor, counselors and directors have helped with student persistence. Areas in need of improvement are identified early and remediation is provided.

Growth: There is an immediate demand for LPNs and Surgical Technologists across the state. Based on the aging population trends and imminent retirement of the baby boomers, there will be a demand for RNs in the state.

3b. Position(s) responsible.

All faculty, counselors, lab resource center, directors.

3c. Synergies with other programs, units

3d. Key community partners

Clinical settings in Long-Term Care and Acute Care hospitals and clinics are key to PN student skill development.

4. Outcome 4: Sustainable

In collaboration with Le‘ahi Hospital and their Master Plan, develop a Kūpuna Clinical Teaching Hospital for Health Academic Programs.

4a. Strategies.

Reinforcing a commitment from all to reduce light and air-conditioning use. Limiting air-conditioning during off-hours would result in reduced electrical use. Coordinate with Auxiliary Services and the Air-conditioning maintenance service to prevent overcooling.
4b. Position(s) responsible.
Department Chair, Programs Director, administrative staff and Auxiliary Services.

4c. Synergies with other programs, units

The Practical Nursing program coordinates learning skills from the following Health Science Programs: Medical Assisting, and Phlebotomy. They are also participating in a Perkin’s Grant for “On Campus clinic to improve and maintain core Perkin’s Indicators Across Four Healthcare Programs”

4d. Key community partners - see above.

Part VIII. Resource and Budget Implications.

The department receive funds from a variety of sources, i.e. general funds, tuition and fees, professional fees, grants, and private donations to ensure the achievement of our planned outcomes.

Outcome 1

- Annual accreditation fees (ACEN)
- NLN annual membership fee
- CCPS annual fee for clinical placement
- Sim Lab maintenance
- Lab supplies
- Lab equipment
- Mileage reimbursement to faculty for off-site clinical
- Mountain Measures reports
- Marketing materials
- PN accreditation fees
- Online survey fees
- Office supplies
- Professional development activities for faculty

Outcome 2

- Computers
- Software
- Fees associated with Advisory Committee Meetings

Outcome 3

- Materials for high school career day

Outcome 4

- Renovation of classroom and labs
- Energy efficient equipment

The renovation of our lecture classrooms has been completed. Additional financial resources will be needed to adequately equip the lab-classrooms. Ongoing maintenance of labs, beds,
simulation manikins, computers, and AV equipment is ongoing through the 2 camp sites.
Our labs must be equipped with equipment that mirror industry. Medical equipment is expensive. Our lab supplies and equipment account for a third of the department’s budget.

There is an increased demand for licensed practical nurses and surgical technologists in the community. As we move to increase the cohort size, the PN program will additional lab resource hours to practice skills. In addition, the increased demand will be a challenge for clinical sites that have decrease the student to faculty ratio in the past 3 years, from 10:1 to 6:1. The PN Program will focus on Long-Term Care and outpatient clinics. With computer-based testing, additional computers are needed for use during testing as most students use tablets but the testing software does not perform well with tablets.

**Part IX. Evaluation of Data and Measurable Improvement in Last 12 months**

- NCLEX pass rates generally above 90%
- Hiring of 2 full-time faculty and 4 part-time faculty members
- Acquired 3-yr warranties for each simulation mannequin
- All MOAs with clinical facilities updated
- Acquired two new clinical site for practical nursing program
- Created a joint payment agreement with members of HNSC consortium. NLN membership payment reduced from $1915 to $361
- Continued the 5-yr bed replacement plan
- Attendance at the national conference by two full-time faculty

**Improvements to be made in next 12 months**

- Hire 2 full-time and 2 part-time faculty members
- Initiate accreditation process for practical nursing program
- Increase enrollment
- Fund professional opportunities for faculty and staff
- Increase the use of technological resources for assessment and student learning opportunities
- Begin negotiations to renovate nursing lab (Kopiko 240, 241 and 242)
- Meet all performance measures goals
- Modify the LPN to RN Transition bridge program
- Maintaining partnership with the consortium members to evaluate outcomes and make improvements when necessary
- Achieve and maintain nurse leadership membership and leadership in national organization
